DOB : 01/12/2005
Languages: English (Fluent)

Professional Summary

- Proficient in creating modern Web applications using multiple stacks and technologies.
- Proficient in Javascript (MERN) and python (Django).
- Proficient in Node.js, React.js, Javascript ES6
- Familiar with Angular.js, ASP.net, NoSQL, Jquery, Bootstrap, Git, Ecommerce Website Development, Unity Game Engine, Shopify and Web APIs.

Work Experience

Ozarion Software Solutions (Oct 2018 - Jul 2019)
I worked at Ozarion Software Solution as a Mern Stack developer. My role was to make beautiful eye-catching and fully functional web applications. I made applications that were Mobile friendly and Fast. My role at Ozarion Software Solution was mainly focused on frontend Designing but I did collaborate in several backend Javascript projects as well.

- User Authentication
- Beautiful Design
- Albums, Playlist single songs
- Save Songs
- Popular Songs
- Today's Hot New Songs Chart etc.

Troopsie | Online Grocery Delivery App **-** A Online Web Application made with MERN Stack and Shopify Api

- Multi vendor and Multi store Ecommerce website built using React.js and Shopify Backend
- Users can select products from many stores in their area and get them delivered at their doorsteps
- A data scraper is implemented to scrape products from many stores and create products
- Shopify tags and smart collections are then used to smartly create stores in different regions based on area code
- Fluid user experience because of React.js Single Page Application UI.
- Node.js, Express.js and Shopify Admin API used for backend.
- React.js and Redux used for Frontend

Snaphunt | Social Media App **-** SnapHunt is a social media app I made using ReactNative for one of my clients. In Snaphunt, you can make and attempt different types of challenges, follow other hunters and grow your snapscore.
